

The Charlton Garden Club

The Charlton Garden Club is an organization that brings together individuals from the local area who share a common interest and enjoyment of gardening.

Our goal is to share gardening skills, information, and educate one another through demonstrations, discussions and guest speakers.

We hope to inspire interest in new gardening subjects and enhance the community through improvement of our own gardens while employing environmentally safe techniques and doing special projects.

The club also plants and maintains the Town Gardens in Charlton. St Paul's Museum, Maple Ave School House, Town Gazebo, and planters and window boxes at the Community Center.
